Software Engineer — Backend & Full Stack

MCA graduate (2024) with experience building and deploying full-stack applications using Django, FastAPI, React, and WebSockets. Skilled in designing REST APIs, authentication systems, database schemas, and real-time communication systems. Focused on backend engineering, system design fundamentals, and production-ready application development. Strong foundation in DSA, OOP, and DBMS.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Backend: Django, FastAPI, REST APIs, JWT Authentication, WebSockets, ASGI

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Databases: MySQL, SQLite, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Tools: Git, GitHub, Postman, VS Code, Render, Vercel

AI / Workflow: LangGraph, Groq API, Llama 3 (integrated in CRM project)

PROJECTS

AI-Integrated CRM System

[React](#) | [FastAPI](#) | [Redux](#) | [SQLite](#) | [LangGraph](#) | [Render + Vercel](#)

- **Built a full-stack CRM** with structured workflow execution and AI-assisted task automation using LangGraph — keeping core business logic cleanly separated from the AI layer
- **Designed scalable REST APIs in FastAPI** with separation of concerns across authentication, workflow processing, and data management; included consistent error handling and response schemas
- **Designed normalized relational database schema** ensuring referential integrity, efficient querying, and consistent data storage across CRM modules
- **Built Redux-based frontend architecture** for predictable state management across complex multi-module CRM workflows with real-time UI updates
- **Deployed production-ready system** with environment-based configuration — backend on Render, frontend on Vercel with proper CORS and API routing setup

Real-Time Chat Application

[React](#) | [Django Channels](#) | [WebSockets](#) | [Redis](#) | [ASGI](#) | [Render + Vercel](#)

- **Built a scalable multi-room chat system** using Django Channels and WebSockets for persistent real-time bi-directional communication across concurrent users
- **Used Redis as a message broker** to efficiently handle asynchronous message routing and delivery across multiple chat rooms
- **Designed ASGI-based backend architecture** supporting persistent concurrent WebSocket connections with clean channel layer separation for scalability
- **Implemented authentication flow, CORS handling,** and production deployment configuration for a distributed frontend-backend setup
- **Built responsive React UI** with real-time message delivery, room switching, and smooth user interaction

INTERNSHIP EXPERIENCE

Web Development Intern — CodSoft

Feb 2024 – Mar 2024

- **Built client-side web applications** using HTML, CSS, and JavaScript

- **Improved UI responsiveness and usability** across multiple web-based projects

Web Development Intern — The Sparks Foundation

Oct 2023

- **Developed a donation platform** with Razorpay payment gateway integration
- **Assisted in end-to-end deployment** and user acceptance testing of the application

EDUCATION

MCA — Kaziranga University

2022–2024

CGPA: 7.55

BSc IT — Kaziranga University

2019–2022

CGPA: 7.65

CODING PROFILE

- **Regular practice on LeetCode and GeeksforGeeks** — focused on Arrays, Hashing, Two Pointers, Sliding Window, Stack, and Trees
- **Focus on problem-solving patterns, time complexity analysis,** and interview preparation

CERTIFICATIONS

- **Python Data Structures & Algorithms** — Udemy
- **AWS Fundamentals** — Udemy
